The following is an examiner's statement of reasons for allowance: Masuda et al taken in combination with Wen et al and the declaration of William Forman filed on 9-1-06 are considered the closest prior art. There is insufficient motivation to combine the Masuda et al and Wen et al references since Masuda et al employs a compressible media whereas Wen et al utilize a non-compressible media. In addition, compressing the fibrous media with a movable plate positioned above the media bed as in the case of the claimed invention provides a filtration bed having a porosity gradient that yields unexpected results as shown in the Forman declaration filed on 9-1-06 and the Tchobanoglous declaration filed on 5-5-06. While item 25 of the Foreman declaration admits of a known filter including the claimed compressible media and movable upper plate, the declaration states that the plate was not used to compress the media, and therefor, the known filter could not have included the claimed porosity gradient.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
